

EVERGREEN ♦ EAST HILLS VISION STRATEGY

Summary of 12/1/04 EVP Task Force Schools Discussion

Mount Pleasant Elementary School District (George Perez)

- Junior High has capacity; no capacity at elementary schools
- District qualifies for state new school money; needs 10 acres for new elementary school

Evergreen Elementary School District (Tom Andrade)

- Can expect the need for 10-12 acres for a new school on the industrial site
- Site with biggest challenge is Arcadia
- If City approves “EVP” Evergreen Elementary School District may need 1 or 2 new schools.

East Side Union High School District (Alan Garofalo)

- District is not in position to purchase land and not in position to say it could build a new school.
- Developer’s numbers would generate 411 high school students.
- If demographic study says there will be 500 new high school kids the District is not going to build a new high school. If there are 3,000 new kids may look at adding buildings or possibly a new site.
- District facilities have been expanded and attendance has gone down at several schools.
